Education

General Assembly

New York, NY

Advance Software Engineering Immersive Program (Jun. 2025)

- **Coursework:** Full-Stack Development (MERN/CRUD), Advanced JavaScript (ES6+), React, Node.js, Express, PostgreSQL/MongoDB, REST APIs, Test-Driven Development (TDD), CI/CD Pipelines, Functional Programming, Jest, and Agile Methodology

Queens College, City University of New York

New York, NY

Bachelor of Arts in Economics (Jun. 2020)

- **Research:** Analyzed OECD data for 37 countries to determine the relationship between Labor Productivity & Utilization.
- **Coursework:** Price Theory, Econometrics, Business & Economics, Statistics.

Borough of Manhattan Community College

New York, NY

Associate of Arts - Liberal Arts (Jun. 2016)

Experience

Revature

Remote

Software Engineer Apprentice (Structured Training Program)

Jun. 2026 – Present

- Wrote and optimized SQL queries for data extraction, transformation, and reporting from large datasets.
- Collaborated with cross-functional engineering teams to diagnose and resolve backend software issues, contributing fixes to a Python codebase serving 200+ users.
- Participated in code reviews, testing, debugging, and documentation following Agile development practices.

Felipe Tax Corporation

New York, NY – Hybrid

Tax Preparer

Jan. 2022 – Apr. 2025

- Analyzed large financial datasets for 300+ individual and business tax returns annually, maintaining a zero-penalty record through rigorous multi-step review and reconciliation processes.
- Provided data-driven financial advice, optimizing tax liabilities and maximizing return value based on detailed analytics.
- Trained 5+ staff members on digital filing systems and standardized documentation processes, cutting on-boarding time by 2 hours.

Walmart E-Commerce

Pedricktown, NJ

Logistics Coordinator

Aug. 2020 – Dec. 2021

- Managed and queried high-volume SQL and NOVA databases containing logistics data for a national distribution center.
- Engineered a dashboard to monitor & categorize 50/weekly incoming tickets, reducing critical system response time by 25%.
- Collaborated directly with senior backend engineers on 3 major process automation projects to troubleshoot system errors and streamline large-scale package flow.

Projects

Cook Up | *React, Node.js, Express, and MongoDB*

- Built a full-stack MERN application using a service-oriented architecture, separating the React client, Express REST API, database layer, and external AI service.
- Integrated the Google Gemini API as an external AI service for recipe generation, using asynchronous request handling and structured JSON responses to isolate AI functionality from the frontend.
- Applied microservice-inspired patterns including API boundaries, separation of concerns, asynchronous service communication, and graceful handling of external-service responses.
- Implemented JWT-protected CRUD workflows for recipe creation, editing, and deletion while maintaining persistent user data in MongoDB.
- Designed loading and error states around asynchronous AI requests to provide users with feedback while external services processed recipe-generation requests.

Echoes | *Python, Django, PostgreSQL, HTML, CSS, auto.dev API*

- Built a full-stack Django application for creating and managing vehicle listings with authenticated user accounts and persistent relational data.
- Integrated Auto.dev as an external vehicle-data service, retrieving VIN-based make, model, year, and trim information through authenticated API requests.
- Applied service-oriented design patterns by separating external API communication, application business logic, user authentication, and persistence responsibilities.
- Used Django model relationships to maintain clear ownership boundaries between users, profiles, and vehicle listings.

Technical Skills

Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL, Tailwind CSS

Frameworks, Libraries & Databases: React, Node.js, Express, Django, Bootstrap, jQuery, PostgreSQL, MongoDB

Tools & Platforms: Git/GitHub, GitHub Actions, VS Code, Postman, Heroku, Render, Netlify

Coursework/Concepts: REST APIs, Agile, Data Analysis, ETL, Responsive Design, Test-Driven Development (TDD)
